

Quality products,
delivered on time.

We make it
happen.

STEEL FRAMES DIRECT

Steel Frames Direct is committed to building confidence through transparency and clear communication with our customers, focusing on consistency and delivering more innovative building framing solutions.

Steel Frames Direct engage in using the most advanced steel framing system available globally.

Our Elite Engineering and Digital Design Integration Software allow us to produce accurate custom-designed products at a high volume with maximum efficiency.

All SFD framing is modelled to comply with all the relevant Codes of Conduct and Engineering specifications.

ADVANTAGES OF LIGHT GAUGE STEEL FRAMING

- Advanced Architectural Expression
- Flexible designs that allow for wider spans
- Configuration accuracy and adaptability
- Fast-tracking the construction process
- Incredibly strong & durable
- Straight - doesn't twist or warp over time
- Termite proof
- Non-flammable
- Reduced construction weight
- Prefabricated - accurately assembled
- Lightweight - easily erected
- 100% Recyclable & reduced waste
- Great value for money
